TMLS22 — Project Rubrics

Florian Westphal

August 26, 2023

Criterion	Grade 5	Grade 4	Grade 3	Fail
Abstract	Concise summary of main contributions and results	General summary of what has been done	Description of what has been done, but missing main contributions or results	Missing main contributions and results
Introduction	Description of the addressed problem including motivation and main findings	Description of the addressed problem but without motivation or main findings	Description of the addressed problem without motivation and findings	Missing description of addressed problem
Related Work	Discussion of at least 3 articles including a brief summary and how they relate to what has been done	Summary of at least 3 related articles	Summary of at least one related article	No or only unrelated articles
Background	Concise description of all used methods with particular focus on the aspects relevant for the project	Description of all used methods	Description of most used methods	No or incorrect descriptions of used methods

Data Exploration	Thorough data analysis uncovering relevant properties for the project (missing data, correlations, …)	Data analysis uncovering several properties of the dataset	Shallow analysis without discussion of the meaning of the findings	No data exploration
Approach Description	Thorough description of how the used methods have been modified and why to suit the problem at hand (enable reproduction)	Description of how the used methods have been modified to suite the problem at hand (almost all details for reproduction)	Shallow description of how the used methods have been modified to suite the problem at hand (a few missing details)	Insufficient details for reproduction
Experiment Design	Clear description of used training and testing procedure, as well as the used metrics	Clear description of used training and testing procedure, as well as the used metrics	Clear description of used training and testing procedure, as well as the used metrics	Unclear/missing description
Result Analysis	Suitable presentation of the obtained results and insightful analysis of the results	Suitable presentation of the obtained results and some discussion	Presentation of the obtained results	Missing results or results that do not facilitate comparisons between the different methods
Conclusion	Concise summary of what has been done, the obtained results and clear recommendations	Summary of what has been done, the obtained results and some recommendations	Summary of what has been done and obtained results	Missing summary of what has been done/achieved
Writing	The writing is very clear, excellently structured, and easy to follow throughout the report	The writing is very clear throughout the report, with only minor issues	The writing is understandable, but occasionally hard to follow	The writing is often hard to follow and/or contains many errors that distract from the content
Overall Presentation	Appropriate figures (and tables) are used to describe the used approaches and the obtained results	Appropriate figures (and tables) are used to describe the obtained results	Appropriate tables are used to describe the obtained results	Results are not presented in figures or tables
